

Are you a recent graduate ready to make your mark in the tech world? At point electronic GmbH, we're a family-owned company with over 30 years of international success.

Based in Halle (Saale) we develop innovative hardware and software solutions that enhance electron microscopes—making them smarter, more efficient, and future-ready.

To strengthen our team, we are currently looking for a

Junior Software Developer (m/f/d)

Location: Halle (Saale) | Full-time | Permanent Position

Why you'll love working with us:

- Exciting projects with real-world applications in science and technology
- A supportive team that values fresh ideas and collaboration
- Flexible working hours to suit your lifestyle
- Professional development through training, mentoring, and learning opportunities
- Attractive social and fringe benefits

Your role:

- Develop modern software for electron microscopy systems
- Design intuitive user interfaces for scientific applications
- Help design control systems for high-tech hardware
- Maintain and document software

Your profile:

- Degree in Computer Science or related field (Bachelor's or Master's)
- Experience as a Front-End Developer, ideally with Full Stack capabilities
- Proficient in C#/.NET
- Familiar with MS Visual Studio
- Interest or experience in image and signal processing is a plus
- Good practical English skills (spoken and written)

Ready to grow with us?

We welcome applications from people who want to help shape our future and grow with us.

Send us your application (at least a CV & degree certificate) along with your earliest possible start date to karriere@pointelectronic.de
